PATH Technical Assistance Marketplace Fact Sheet

Providing Access and Transforming Health (PATH) Technical Assistance (TA) Marketplace

The PATH TA Marketplace is a one-stop-shop website where entities can access free TA services from curated and approved vendors. The services offered can help eligible organizations implement successful Enhanced Care Management (ECM) and Community Supports services to build data capacity, strengthen services, promote health equity, and much more. Services offered through the TA Marketplace are provided at **no cost to the TA recipient.**

Strengthening Medi-Cal Through PATH

PATH is a five-year, $1.85 billion initiative to build up the capacity and infrastructure of on-the-ground partners, such as community-based organizations (CBOs), public hospitals, county agencies, Medi-Cal Tribal and designees of Indian Health Programs, and others, to successfully participate in the Medi-Cal delivery system as California widely implements ECM and Community Supports and Justice Involved services under CalAIM.

TA Recipient Eligibility Criteria

The following organizations are eligible and encouraged to apply to become a TA recipient:

- County, city, and local government agencies including public health departments
- Providers (including but not limited to public hospitals and provider organizations)
- Community-based organizations (CBOs)
- Other ECM and Community Supports providers
- Correctional agencies and other justice-involved stakeholders
- Medi-Cal Tribal and Designees of Indian Health Programs

Technical Assistance Domains

TA is offered in the following domain areas, providing a wide variety of services based on your organization's needs:

- Building Data Capacity | Data Collection, Management, Sharing, and Use
- Community Supports | Strengthening Services that Address the Social Drivers of Health
- Engaging in CalAIM through Medi-Cal Managed Care
- Enhanced Care Management (ECM) | Strengthening Care for ECM "Populations of Focus"
- Promoting Health Equity
- Supporting Cross-Sector Partnerships
- Workforce
- Others as approved by DHCS

Service Offering Examples

A few examples of technical assistance services offered through the PATH TA Marketplace include:

- **Hands-on trainings** for ECM/Community Supports providers regarding billing and reporting requirements, contracting with health plans, and other areas
- **Guidance for data sharing processes** between ECM/Community Supports providers and health plans
- **Accelerated learning sessions** or computer-based learning modules for CBOs
- **Support and best practices** for entities implementing ECM/Community Supports

A TA Recipient Experience

A CBO providing children and family services in central California is receiving TA from a Vendor experienced in contracting to improve their ability to engage with Managed Care Plans (MCP) to contract for ECM and Community Support services.

TA Services are Offered in Two Ways:

"Hands-on" custom TA services allow eligible entities to work closely with experienced vendors to design and implement systems, training, and recruitment processes uniquely suited to their priorities and needs. TA goals, deliverables, and timeframes are all developed "from scratch" and are specific to the individual entity and project.

"Off-the-shelf" TA Projects are ready to go TA offerings packaged for convenient, efficient delivery. Off-the-shelf projects are more standardized resources like trainings, well-defined program models or data tools, and best practices guides that are relevant in a variety of settings with little to no customization.

Coming Soon: On-Demand Resources

On-Demand TA offerings are static resources which will be made available directly through the TA Marketplace website, and do not require any direct contact between the recipient and vendor, unlike off-the-shelf and hands-on projects.

Explore the PATH TA Marketplace, apply to become a TA recipient, and learn more by visiting ca-path.com/ta-marketplace.
